

Orange My Favorite Color

Mick Piontek

July 2020

Well the left has finally fallen into the trap, Yesterday Dec 18 2019 the small (thank God) group of fanatics moved to impeach or "imorange" the President. with their own scenarios of how things went and a deep belief in the validity of their story telling committees and panels wasted a great deal of their valuable vacation time and our money and patience. The vote which reflects the party membership rolls of congress looks for all intents and purposes a we against them last stand before the left is out the door in 2020. In Battle Creek Michigan last night President Trump (nice ring to it) calmly destroyed their position and the "deplorable" reacted not so calmly. A great time was had by all!

In reference to the above graphic President Trump is the leader of the "Orange Men" a radically right and not so secrete society (because of their skin color) their purpose is to promote Florida and it's oranges. Membership packets includes bottle of Coppertone Q T which will quickly turn your skin to the proper tone.
